
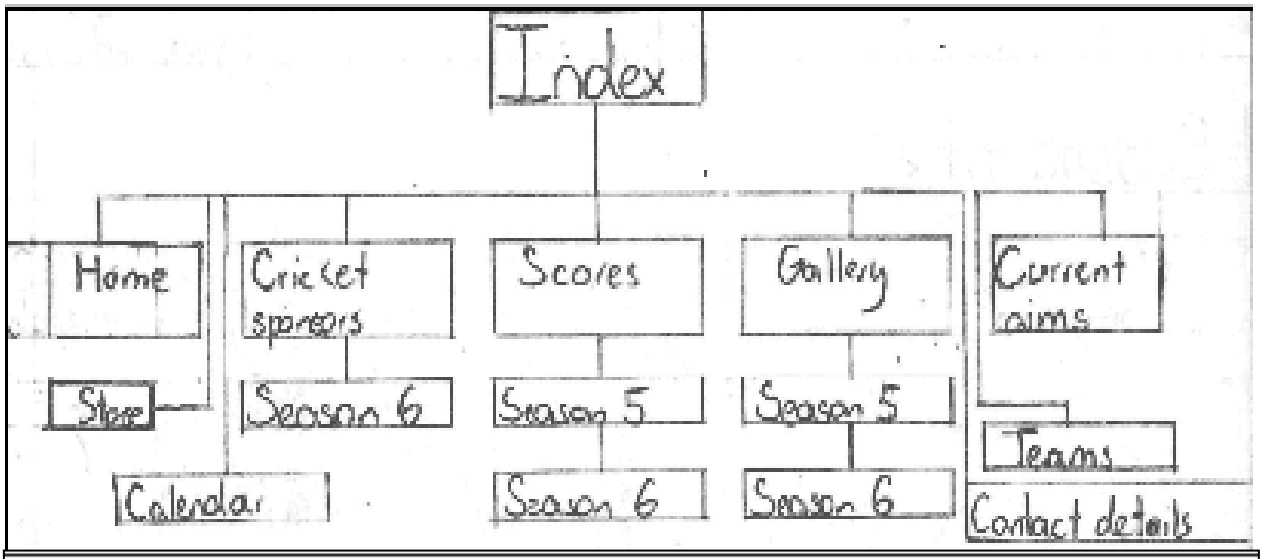

Figure 1: This shows the planned design for the "Index" page of the website. It also includes the information each separate page will include.

Key

Home: The home will include a description of El Salvador Cricket along with photos. It will also include the logo of our main sponsor and a small recruitment poster.

Contact Details: This page will include the contact details of El Salvador Crickets president, the fields address, twitter page and the Facebook fan page.

Cricket sponsors: This page will include all our current sponsors and a section where national and international people can donate towards the growth of the club.

Scores: There will be two pages within the scores page. One will be for season 5 and season 6. Both pages will include the total amount of scores made by each player along with awards the players received.

Gallery: There will be two pages in the gallery page. One will be for Season 5 and Season 6. The gallery will include photos of players and videos of our training sessions.

Current aims: This page will describe the aims El Salvador Cricket has. Such as having a field of our own, affiliating with the ICC (International Cricket Board), need for more players, among others. It will also include what the club needs in order to affiliate with the ICC, which is our primary goal. This page will also include a direct link towards the page where one can donate to the club.

Calendar: This page will give a preview of most of our future games, both international and national.

Store: This page will show El Salvador Cricket items that are for sale. E.g.; Jersey, shirt, etc. It will also include instructions for people interested in buying the items. At the moment, people will only be able to buy them if they are in El Salvador, in order to do so they would need to go to the actual store. Directions for such will be provided.

Teams: This page will provide the name of every player in every local team, and a few words of every local team's captain.

Overall structure of website

Internal structure

List of resources and techniques

Resources	Details
Design your own website-Roger Laing and Ryhs Lewis	I used this book to learn about CSS and design techniques.
Images of El Salvador Cricket	Pictures where taken by several different people and were given to El Salvador Cricket with full rights over the photos. El Salvador Cricket then provided me with the photos for the website.
El Salvador Cricket Video	The video was taken by Benjamin Judge. He gave me full permission to modify it as I wished.

Techniques	Details
Edited Original Sound	I will edit the original sound in case it is hard to hear what is being said.
Edited Original Video	I will edit the original video by cutting some parts as well as speeding or slowing them down.
Manipulation of codes such as HTML	Improve the layout
Search engine optimization techniques	In order to improve the visibility to search engines
Use of tables or layers for layout	In order for the information to be organized
Navigation(internal and external links)	In order to quicken the shifting within the website
Combining text and graphics	I will use this technique in order to make the website seem formal yet informative.
Cascading style sheets or schema	This will be used in order to improve the overall layout, colors and styles of the website

Combining two software applications	I will combine the text editing software, photo editing software and the website editing software.

Test plan

Test item	Test data	Part of system tested	Expected outcome	Actual outcome	Comments	Ref in product
Cover page testing – REQUIRED ELEMENT FOR CRITERION G						
Web pages load from the cover page in three different locations	**File naming to ensure home page is called Index.htm**	**Links on cover page are relative**	**Loads as required from 3 different locations**			
Product testing						
Links within the website	Opening the site		Opening the link and making sure it directs me to the designated area	The links within the website worked perfectly and my method of checking whether they were broken or not worked well.		
Videos functioning	Opening video		Making sure that the links to the videos aren't broken	The video works well since I can play it and besides it has a link to the video on YouTube.		
Images appropriate resolution	Viewing image		Measuring the image size and seeing whether it is appropriate according to the size of the	Yes, the outcome worked out well because the sizes of the images change as the		

			computer.	screen size changes.		
CSS	I will open the website on different computer sizes to verify that the website borders open according to the computer size screen.		I expect the borders width and length to be suitable according to the computer screen size.	The position of the pages change as the size of the screen changes, hence the outcome is positive.		

Agreement of client

I confirm that the requirement specification meets my needs and the designs above are appropriate for the creation of the product.
